

# Loss control in maritime transportation of petroleum cargo

## Mitigate the loss!!

13th - 14th July 2017  
Kuala Lumpur, Malaysia

### Handouts:

Participants will receive at the end of successful attendance of workshop & training, copies of presentation slides & related work material.

Participants can keep a copy of worksheets & exercise notes prepared during the workshop, including case studies & other interactive activities.

### Major Benefits Of Attending

- **WIDEN** the understanding of Cargo Claims Analysis
- **GAINING** a thorough understanding of contracts for oil transportation
- **STUDY** and **DISCUSS** the losses due to piracy
- **REDUCE** the overall oil losses in shipping
- **IDENTIFY** the calculation of crude oils
- **DETERMINING** if a cargo is pumpable

### Why you Should Attend?

This workshop is aimed to help one understand certain limitations that exist within the industry, pertaining to loss of petroleum cargoes during transportation & the factors affecting such a loss & measures that can be taken in order to control & minimise such losses.

Participants will be taken through detailed aspects that affect losses during oil transportation, through presentations, case studies & workshop initiatives.

Furthermore, you will learn to build mind-set and productive workplace relationships, settle more confidently into your own 'comfort zone' as a manager, leader and champion of change not to mention gain control of events around you and shape them to meet the right objectives.

Finally, you will increase business profitability, credibility and efficiency by attending this event.

### Who Should Attend?

This workshop is especially designed for management & executive level staff working in shipping companies, tanker operators ship-owners and Charterers of oil tankers, including:

- ✓ Marine Superintendents
- ✓ Marine Inspectors
- ✓ Marine Operations Managers
- ✓ Marine Surveyors
- ✓ Vetting Managers
- ✓ Fleet Managers
- ✓ Ship Masters
- ✓ Ship Officers
- ✓ Port & Terminal Officers
