- **CREATE, DOCUMENT** and **TEST** continuity arrangements for an organization
- **SELECT** and **DEPLOY** suitable Business Continuity tools
- **ORGANIZE** and **MANAGE** recovery teams
- **DEFINE** the business continuity lifecycle
- **ESTABLISH** a business continuity response
- **DEVELOP** methods for exercise, maintain and review plans

Why you Should Attend?

In today's world of high profile disasters, almost everyone is paying more attention to the need for business continuity and disaster recovery planning. How to access an Infrastructure solution that address a critical component of an efficient and cost effective business continuity solution by allowing users to access critical resources required to work productively during a disruption is extremely vital. Disaster can strike any business, anywhere, at any time. Be it a risk of natural disasters, threat of terrorist attacks, and loss of power, fire, hardware failure or breaches. Your business is not reliant on its IT infrastructure but also people and regular practice. You need to ensure that you can recover your systems in the event of any disaster, quickly and with minimal disruption.

After attending this training, you will have the ability to both assess and reduce the risk and vulnerability that your organisation faces. The value in this ability in itself is phenomenal.

This acclaimed training programme shows how to meet these demands to ensure continuity of business processes and the survival of the organisation.

Who Should Attend?

This course is recommended for CEOs, VPs, Directors, GMs, HODs, Senior Managers, Managers and Board Members responsible for:

- ✓ Business Continuity
- ✓ Crisis Management
- ✓ Risk management
- ✓ Health and Safety
