

WELDING TECHNOLOGY AND QUALIFICATIONS

Upgrade Welding Knowledge and Skills

2nd & 3rd November 2017
Kuala Lumpur, Malaysia

Major Benefits Of Attending

By end of the course, delegates will be able to:

- **GAIN** a practical knowledge on all welding activities
- **UNDERSTAND** quality assurance / quality control requirements (ISO3834)
- **DECIPHER** QA/QC requirements in welded fabrication
- **MASTER** the principles and application of different NDE methods
- **COMPREHEND** the certification process according to ASME IX and / or ISO 15614
- **HANDLE** with several codes and standards
- **RECOGNIZE** material problems due to welding activities
- **UPGRADE** knowledge and skills of Welding

Why you Should Attend?

Organizations today recognize that welding technology is intrinsically linked to the fabrication performance since fabrication costs are one of the largest portion of the overall production cost. This workshop will explore your role as a welding person as well as the latest innovations and strategies of welding technologies. It is a big opportunity to share your experience while gaining a deeper insight on all welding facts.

In this 2-day hands-on interactive workshop, you will work through all aspects of welding. After these two days, you will be exposed to international codes and standards related to welding, which will be essential for improving daily productivity; not to mention personal development.

Who Should Attend?

This event has been specifically designed for:

- ✓ Welding Engineers
- ✓ QA/QC Engineers
- ✓ Process Engineers and Managers
- ✓ Supervisors
- ✓ Inspectors
- ✓ Maintenance Engineers and Managers
- ✓ Technical Engineers and Managers
- ✓ Reliability Engineers and Managers
- ✓ All interacting personnel involved in the welding department
