

3-Day Master Class in Turnaround and Shutdown Management

Increasing reliability, minimising downtime and driving bottom-line growth through world class turnaround strategies

27th - 29th September 2017
Kuala Lumpur, Malaysia

Free takeaway:

Each participant will receive an E-copy of Turnaround Training manual by Eric Scott for FREE!

Major Benefits of Attending

- **UNDERSTAND** safety, quality, efficiency, and cost effectiveness of the turnaround procedure
- **INCREASE** profitability and productivity of both internal and contractor staff
- **DEVELOP** an action plan to improve their own turnaround management techniques
- **MASTER** world class plant shutdown strategies and industry best practices
- **CREATE** awareness of planning methods and an integrated organisational approach in the execution of successful turnarounds
- **UNDERSTANDING** risks associated with process plant start-up and shutdown

Why you Should Attend?

The Course is the product of over 30 years of practice by turnaround professionals working in different industries in many countries around the globe and its principles are embodied in the "Model of Excellence for Turnarounds" that forms the central pillar of the workshop.

The basic principles of the methodology are:

There are only two types of work on a turnaround, routine and unexpected. If the routine is under control there is time to deal with the unexpected but if the routine becomes unexpected the unexpected may become catastrophic".

Each module offers a practical approach with exercises and examples that draw out and develop participants learning and experience in addition to that offered by the workshop.
