

# NEC4: The Next Generation NEC Contract

End-to-end project management contracts that empower users to deliver projects on time, on budget and to the highest standards – from planning, design and project management, construction, maintenance and facilities management.

27th - 28th July 2017  
Kuala Lumpur, Malaysia

## Major Benefits Of Attending – You Will Be Able To:

- **MASTER** the processes and procedures applicable to the implementation and administration of NEC4 construction, maintenance, supply and professional services contracts
- **RECOGNISE** the differences between contract strategies using the ECC
- **KNOW** how to use Contract Data and Scope
- **UNDERSTAND** the roles and responsibilities of the key parties under the NEC4 contract
- **LEARN** how to quantify claims for additional time and for additional money using a prospective approach and by the NEC's Schedule of Cost Components
- **UNDERSTAND** how you can make the best use of the NEC4 contract
- **IDENTIFY** the common issues still occurring on projects working to NEC3 and how they could be overcome/avoided

## Why you Should Attend?

This event has been developed to help practitioners understand the new complete NEC4 suite of standard construction and facilities management contracts, which is planned to be launched in June 2017. The workshop will focus on the key changes affecting the NEC4 contract, as well as the new contracts introduced. The NEC suite of contracts has become the contract of choice for many public sector procurers of construction and maintenance works, and it is critical that practitioners understand changes to the contracts, as well as accompanying guidance.

Delegates of this course will have a much clearer understanding of the intent of the specific contractual clauses of the new NEC4 contracts and in practical terms begin to see how they should be understood/administered for the benefit of all parties on a particular project.

## Who Should Attend?

This course is highly recommended for employers, contractors, consultants and professionals using NEC contracts and those who are involved with or responsible for the procurement and implementation thereof.

- ✓ Employers (Operating in retail, infrastructure, transportation, petrochemical or the oil and gas industry)
- ✓ Contractors and Sub-Contractors
- ✓ Engineers and Project Managers
- ✓ Consultants
- ✓ Architects
- ✓ Quantity Surveyors and Cost Engineers
- ✓ Planners
- ✓ Legal Advisors
- ✓ And others involved with or responsible for the procurement and implementation of NEC contracts
