## Why You Should Attend?

Do you have an in-depth knowledge about Asset Liability Management (ALM)? Are you aware of the key risk factors that affect ALM practices? Are you having issues in using the appropriate methods in managing your risks?

If you are facing any issues on ALM or often losing track on managing your risks, this is the course designed for you to attend. This two days course will be presenting you an advanced level of learning ALM. It will be first covering ALM regulatory framework, Gap Analysis, Basel III liquidity ratios and IV, other metrics and non-metrics. On the second day, it will be explaining on ALM modeling, managing interest risk and liquidity risk, ALM risk governance and sensitivity and stress-testing. Group discussions and case studies will be performed each day. A case study with a role game will be performed.
