

# Best Practices For Cost Effectiveness Of Maintenance Masterclass

An In-Depth Learning of Minimizing Maintenance Costs and Maximizing Plant Availability

6th & 7th December 2018  
JW Marriott Hotel, Kuala Lumpur, Malaysia

Delegates are required to bring their Laptop for Exercise and Presentation Purposes

## Major Benefits of Attending

By end of the course, the delegates will be able to:

- **LEARN** the concepts, and practical application of Maintenance Optimization
- **ACQUIRE** knowledge of the potential contribution of RCM to maintenance efficiency and performance
- **UNDERSTAND** the integration between maintenance planning, optimization and reliability techniques in order to minimize maintenance cost and maximize plant availability
- **RECOGNIZE** the KPIs that determine progress and performance
- **IDENTIFY** good maintenance management practices and implement it in your workplace
- **IMPLEMENT** an action plan to make maintenance improvements for your organization

## Why You Should Attend?

The overall aim of this course is to provide you the concepts, knowledge and practical application of maintenance optimization necessary to control the maintenance costs within your organization. You, as a participant will be learning not only the fundamentals of maintenance optimization, but also the strategies and tools of maintenance to manage the costs. Attached with the case studies and group discussions during the course, you will also be away with real life application which you can plan and implement it in your workplace.

## Who Should Attend?

This course has been specifically designed for:

- ✓ Maintenance Engineers, Managers and Supervisors
- ✓ Reliability & Optimization Engineers
- ✓ Planning Engineers
- ✓ Project Engineers and Managers
- ✓ Operations Managers and Supervisors
- ✓ Maintenance Planners (Work Pre-preparers) and Schedulers
- ✓ Shift Managers
