

PUBLIC PRIVATE PARTNERSHIP MASTERCLASS

Develop your understanding on Project Screening and Enrich the Knowledge in Basic Financial Modelling

24th – 25th January 2019
JW Marriott Hotel, Kuala Lumpur, Malaysia

Major Benefits Of Attending

By end of this course, delegates will be able to:

- **LEARN** about the Project Screening and Feasibility
- **UNDERSTAND** the Deal Structuring and Principles Applied to source Project Revenues
- **EXPLORE** the Basic Financial Modelling
- **DISCOVER** the Due Diligence and Risk Matrix and their Relationship in PPP projects
- **UNDERSTAND** the Key Clauses of Concession Agreement
- **DESCRIBE** the Steps in Preparation of a Feasibility Study

Why you Should Attend?

PPPs combine the skills and resources of both the public and private sectors through sharing of risks and responsibilities. This enables governments to benefit from the expertise of the private sector, and allows them to focus instead on policy, planning and regulation by delegating day-to-day operations.

Public-private partnerships are typically found in transport infrastructure such as highways, airports, railroads, bridges and tunnels. Municipal and environmental infrastructures include water and wastewater facilities. Public service accommodations include school buildings, prisons, student dormitories and entertainment or sports facilities.

Worldwide, growing populations, increasing rural urban migration and demands for economic development combine to produce an enormous appetite for infrastructure and social development projects. These range from power sector generation and distribution assets to airports and ports, roads and railways, to schools and hospitals that can only be met by mobilising private finance through Public Private Partnerships.

In this workshop, delegates will learn about the Public Private Partnership in terms of project screening and basic financial modelling. Participants have the opportunity to engage in group exercise on understanding the negotiation process in concession agreement.

Who Should Attend?

This seminar is specifically designed for:

- ✓ Project Managers
- ✓ Developers
- ✓ Construction Companies
- ✓ EPC Contractors
- ✓ O&M Contractors
- ✓ Planners
- ✓ Regulators
