Why you Should Attend?

The function of a properly managed facility is to align the design of the building to the purpose of the occupants. Operations and management departments give the building flexibility to adjust with the ebb and flow of the work it supports. A strategically managed facility plans, maintain, and monitors within the fundamental business activities.

This 2-day Strategic Facilities Management course covers areas like strategic planning, planning for implementation of service design, operations, measuring and reporting of information management, developing facility management, ethics, and more. These areas are just what it requires for a person holding any job role in the facility management site to perform their tasks so the function of the facility is aligned to the design of the building to the purpose of the occupants. This program shows you how to get better results through Strategic Facilities Management techniques you can apply in all aspects of your responsibilities at the local or regional/global level.

In order to maximise engagement, the delivery will include group work, case studies, interactive exercises, and examples of best practice processes and records. You learn leading practices and practical innovative to getting better value out of the suppliers, staff and process you use to deliver services and manage your facility or building.
