

# MARITIME RISK MANAGEMENT & INCIDENT INVESTIGATION

Uncover and identify significant hazards and learn to take cost effective measures to threat and minimize risks proactively

17th - 18th January 2019  
JW Marriott Hotel, Kuala Lumpur, Malaysia

## Free Takeaway

Participants will receive a participant's manual with copies of all PowerPoint slides and supporting notes, copies of all worksheets and group activities and photographic copies of any relevant flipchart or whiteboard notes and projects of your own which will include case studies and other interactive activities.

## Major Benefits of Attending:

- **GRASP** the Risk Management (RM) and Accident Investigation (AI) requirement, process and aims
- **DETERMINE** types of risk and how to prioritise them
- **UNDERSTAND** methods of risk identification and levels of tolerability
- **EXAMINE** make-up and various levels of a RM assessment and teams
- **STUDY** the RM cycle and the need for a live process.
- **UNDERSTAND** frequency, severity, mitigations & controls
- **DISCOVER** RM limitations and risks to integrity
- **DEVELOP** confidence in the practical application of RM with focus on the methodology and challenges common in the maritime industry
- **UNDERSTAND** root cause, causal factors and the differing AI methodologies
- **UNDERSTAND** levels of AI and the complete AI cycle
- **GAIN** insights on common failings of root cause investigations

## Why you Should Attend?

Risk management and accident investigation are high-profile roles which any or all may be required to undertake or participate in, often at short notice. Strong performance in these fields is a highly visible way of standing out for professional development... and yet, these are not core skills for most operational and management personnel, and consequently opportunities are often declined due to lack of confidence or performed poorly due to lack of understanding. Being prepared to undertake these roles effectively contributes significantly both to your employer and your own worth. This particular course is the product of many years of highly practical experience and delivered in an informal, interactive way which encourages easy and thorough learning.

## Who Should Attend?

This workshop is especially designed for management & executive level staff working in shipping companies, tanker operator's ship-owners and Charterers of oil tankers, including:
