

WAREHOUSE OPERATIONS AND PLANNING MASTERCLASS

Working From The Inside Out & The Outside In – Expand your Knowledge in Public Warehousing and Gain Understanding on Warehouse Management Systems

14th & 15th March 2019
JW Marriott Hotel, Kuala Lumpur, Malaysia

DELEGATES ARE
REQUIRED TO BRING
THEIR LAPTOP FOR
GROUP DISCUSSION
AND EXERCISES

Major Benefits Of Attending

By end of this course, delegates will be able to:

- **EDUCATE** the Leadership Differences and how to engage the Workforce
- **UNDERSTAND** the importance of Integrated Business Planning
- **LEARN** about Public Warehousing and best practices in Warehouse Operations
- **LEARN** the Process Flow Mapping
- **UNDERSTAND** the uses and importance of Material Handling Equipment
- **IDENTIFY** the Safety and Recordkeeping needed in Warehousing

Why you Should Attend?

Warehousing and physical distributions are changing dramatically. New approaches and methods offer opportunities to cut costs substantially while improving overall operations. More and more organizations are now focusing on the impact of the warehouse's bottom line and recognizing that their warehouse operations are keys to organizational success.

Companies that make the best use of the principles of planning and managing warehouse operations have competitive advantage. Companies that lack warehouse strategic planning and operational excellence lose profits, market share, cost advantages, and market leadership.

By attending this workshop, delegates will be able to understand the importance of Integrated Business Planning, learn about Public Warehousing and best practices in Warehouse Operations, understand the uses and importance of Material Handling Equipment and also get to know the Process Flow Mapping.

Who Should Attend?

The seminar is specifically designed for:

- ✓ Distribution Supervisors & Managers
- ✓ Inventory Professionals
- ✓ Stock & Warehouse Professionals
- ✓ Supply Chain & Logistics Professionals
- ✓ Professionals looking for business gains and benefits from managing their warehouse operations more effectively
