Why you Should Attend?

In less than a year, in January 2018, the old requirements (IAS 18 Revenue, IAS 11 Construction Contracts and numerous additional interpretations) will be replaced by a single comprehensive IFRS 15 Revenue from Contracts with Customers. One year later, on January 1, 2019, IFRS 16 Leases will enter into force. Accounting departments and financial directors face a number of challenges related to the new standards.

IFRS 15 was effective from 1 January 2018. Decisions should already have been made on which transition approach to adopt – retrospective or cumulative effect. Retrospective application is likely to be challenging, despite the practical expedients available. The IASB has published IFRS 16 – the new leases standard. It comes into effect on 1 January 2019. Virtually every company uses rentals or leasing as a means to obtain access to assets and will therefore be affected by the new standard.

The purpose of this 2 day workshop is to summarise the major impacts of the new IFRS 15 standard on revenue from contracts with customers respectively the new IFRS 16 standard for leases on the reported financial statements.
