- **UNDERSTAND** the rights and obligations, as Employer, Contractor or Engineer under these contracts
- **MASTER** the understanding of FIDIC dispute management and the tools required to properly bring, defend and avoid disputes
- **DISCOVER** the tools and guidelines required to recognise when you have a claim, how to bring it, and how to manage it
- **GAIN** improved ability to evaluate, agree and resolve claims
- **OBTAIN** an understanding of payments, guarantees and retention money under the FIDIC contracts

Why you Should Attend?

In the current economic climate, the last thing one needs on a project is an increase in spending. It affects everybody from the Lender through the Employer and Contractor to the Sub-Contractors and Suppliers. To this end, this course looks to provide a guide to preventing the main ingredients of additional cost and time on projects or at least managing them within tolerable levels.

The course is provided to elevate the ethos of dispute avoidance and the art of working within a 'Team', which will not only provide a working insight into FIDIC Forms of Contract, but also touching on other standard forms and bespoke construction contracts.
