Why you Should Attend?

There are many financial modeling courses on the market these days and you might already have attended one or more of them. In this course, however, we are introducing you to financial modeling with business intelligence. Business Intelligence includes Power Query and Power Pivot technologies that are built into Microsoft Excel now and we will also be introducing you to Microsoft's free Power BI software. Together Power Query, Pivot and BI are taking the business intelligence world by storm.

We will take you by storm too. Millions of rows analyzed, eye catching dashboards have never been so easy to construct and share.

In addition, we are also including the mainstay topics for revision or for review for the first time. Every financial and non financial manager is welcome to attend this course and once you have seen what we are offering, you will definitely want more!

Who Should Attend?

This workshop will be of particular interest to banks, corporate financiers, accountants, financial modellers and consultants faced with such corporate finance decisions, including:

- ✓ CEO / CFO / COO / Finance Directors / Financial Controllers / Heads of Finance
- ✓ Financial Analysts
- ✓ Directors / Heads / Managers of Strategic Planning
