

Cloud computing in the Oil and Gas industry

Implementing strategic cloud solutions for your operations

21st - 22nd August 2019
The Ritz-Carlton, Kuala Lumpur, Malaysia

Free Takeaway

Participants will receive a full manual with copies of all PowerPoint slides and supporting notes, copies of all worksheets and group activities and photographic copies of any relevant flipchart or whiteboard notes and projects of your own which will include case studies and other interactive activities.

Major Benefits of Attending:

- **UNDERSTAND**, construct, map, implement and monitor the benefits of Cloud Computing.
- **UNDERSTAND** and practically deploy the right strategy associated with Cloud Computing tailored for the Oil and Gas industry.
- **IDENTIFY** where and when Cloud Computing solutions can be used effectively and efficiently for best results at the oil drilling platform and the office.
- **BUILD** and **ENGAGE** the IT team to provide, tangible solutions to what appears to be business issues
- **EDUCATE** board of directors and others in the Cloud Computing methodology and associate accountability
- **PROVIDE** the opportunity for financial saving and ROI
- **TRANSFER** knowledge and expertise to new joined staff
- **COMPLY** to the organisation's standards and processes

Why you Should Attend?

Cloud computing has revolutionized the way we communicate or the way businesses access technology for their everyday needs. With the advances in infrastructure, connectivity, mobility and hardware, it really doesn't matter if the business is big or small; there is enough space for everyone on the cloud.

The Oil and gas industry is among the many benefactors of cloud computing. Oil and gas operations involve intensive field work, and the need to share data from field instrumentation, contractors, regulators and other stakeholders in almost real time become crucial for a profitable enterprise. The stakes are very high in oil and gas exploration, usually in hundreds of millions of dollars.

Therefore, do not miss this opportunity to gain insights into the latest cloud solutions tailored at shaping the future of oil & gas and improving your organizations operations.

Who Should Attend?

- ✓ Executive managers;
- ✓ Senior managers;
- ✓ Section managers;
- ✓ Superintendent;
- ✓ Engineers; technicians; OEM; contractors; suppliers; trainers and facilitators of:
- ✓ Operations (QA/QC; production; maintenance; reliability)
